

opentext

It is an incredibly enriching experience that has contributed significantly to my professional development.”

– Hani AlJaser

Aramco cybersecurity professional elevates his information management expertise

Advancing his expertise and sharpening his capabilities in cybersecurity, Aramco employee Hani AlJaser has been working at OpenText through one of Aramco’s professional development programs.

As the digital world continues to expand and evolve at a rapid rate, OpenText continues to be at the forefront of innovation. OpenText is a global information management company that provides solutions to companies and partners from all sizes, helping them to capture, govern, exchange, and secure their information. OpenText also provides a holistic security portfolio of solutions that enable their customers to elevate their cybersecurity posture and maintain their cyber resilience against cyber threats.

During this yearlong partnership, AlJaser gains experience in three key solutions. First, he started with the BrightCloud® Threat Intelligence solution focusing on Web Classification & Reputation, IP Reputation and Real-Time Anti-Phishing Services. Then, he worked on the Webroot Security Awareness & Training solution focusing on Human Risk Management Project. Finally, he is currently working on the ArcSight Intelligence solution focusing on cyber threat hunting leveraging Artificial Intelligence (AI). This program has fostered instrumental skills to help him further develop in his field.

“It is an incredibly enriching experience that has contributed significantly to my professional development” said AlJaser. “I’ve learned vast amounts of knowledge and practical skills necessary to excel in my future endeavors.”

Not only does this partnership allow AlJaser to learn more about cybersecurity from a proponent’s perspective, but it forges a deeper bond between Aramco and OpenText.

“Hani’s been a pleasure to work with,” said Grayson Milbourne, Security Intelligence Director at OpenText. “He’s had an amazing impact. We have really benefited from him joining these teams. I’m excited about what he’s done so far, and I’m excited about what he’ll do in the future.”

AlJaser’s positive attitude and propensity for learning continues to benefit him and his team. Aramco’s cybersecurity team is excited for all the skills AlJaser will bring back to the company.

There are nearly 100 Saudi Aramco professionals who come to the U.S. for training at host companies each year. They engage in specialties including fire protection, environmental protection and sustainability, project management, information technology, oil & gas operations, research & development, pipelines/distribution/terminals, and a broad variety of engineering services.
